

ROWEN BERNDT

AI and Machine Learning Internship Candidate

row.berndt@gmail.com | 603-867-3325 | github.com/rowberndt

AI/ML bootcamp participant with Python and PyTorch experience in computer vision and data pipelines. Seeking an internship contributing to model development and evaluation.

TECHNICAL SKILLS

Programming and data: Python, SQL, NumPy, Pandas, SQLite, Parquet

Machine learning: PyTorch, CNNs, logistic regression, feature engineering, model evaluation

Tools and systems: Git, Docker, Jupyter, Matplotlib, OpenCV, REST APIs, WebSockets, HTML/CSS

TECHNICAL PROJECTS

Foundations

Personal research project | Python, PyTorch, SQLite, Parquet, Docker

- Built a market-data pipeline with WebSocket and REST ingestion, a durable SQLite journal, replayable observations, and Parquet exports for model research.
- Implemented a regularized logistic-regression baseline and event-based chronological evaluation, separating future outcomes from model inputs to reduce data leakage.

Neural Networks and Computer Vision

Self-directed learning projects | PyTorch, NumPy, OpenCV, Matplotlib

- Built a 10-class MNIST classifier using PyTorch and Adam; the saved notebook records 97.2% test accuracy from one run.
- Implemented a three-layer CNN for cat-versus-dog classification with 50 x 50 grayscale preprocessing, CUDA training, a 10% validation split, and accuracy/loss logging.
- Implemented dense layers, ReLU, stable softmax, and categorical cross-entropy in NumPy using the NNFS spiral dataset to study the forward pass.

EDUCATION AND TRAINING

TripleTen | Aug 2026 - Present

AI/ML Bootcamp | In progress

University of New Hampshire | 2025 - 2026

Data Science coursework | One year completed

EXPERIENCE

Website Intern | Hampton Area Chamber of Commerce

Dec 2024 - Mar 2025

- Created and edited web content for chamber members using native web tools, HTML, and CSS; prepared a proposal for future website improvements.

Team Member | Engrain Market

Jun 2024 - Sep 2024

- Managed the shop independently, balanced inventory and customer service, and helped train new team members.
